Best Time to Shop at Factory Outlets

If you managed to catch Extra last week you would have seen www.secretbudget.net talking about now being a really great time to shop at factory outlets. You can save up to 60% and even more of the coming weeks as the stores are chocker block with winter stock that they need to move ASAP.

I shop for my kids, one size up for next year. While I was at Pumpkin Patch, I managed to get 7 top and bottom pairs that were all interchangeable and created a total of 14 outfits for \$101!! Such great savings for a top quality product.
