The REAL Cost of using your credit card [Edit](#)

I came up with what I think is a great idea to prompt me when I use my credit card. I have used a yellow post it note to stick on all my credit cards...I list the interest rate I am paying on this note so when I pull out my credit card to buy something I want (and it is on special)...I add that interest rate to the cost of what I am about to purchase to show how much it is REALY going to cost me!! Works a treat!! (Funnily enough when I was typing this I hit the wrong key and typed "Dredit" card instead...HmMMM theres a sign!!
